Comarch Technologies - a technology wing of Comarch - provides comprehensive end-to-end solutions combining HW & SW following the highest industry standards in safety and security. We offer services for IoT, connected car, mobile software development, interoperability and cyber security.

**Comarch Technologies** - a technology wing of Comarch - provides comprehensive end-to-end solutions combining HW & SW following the highest industry standards in safety and security. We offer services for IoT, connected car, mobile software development, interoperability and cyber security. In the field of embedded software, Comarch Technologies renders services for consumer electronics and automotive R&D focusing on connectivity, data interchangeability, and user experience. Accumulated knowledge and expertise of our employees allows us to deliver high-quality products and services in compliance with industry and security standards.

#### **OUR OFFER:**

**IoT solutions** - In the field of IoT, [Comarch IoT Platform](#) offers standard-based tools, hardware, and services for connecting people, devices, processes and data as well as building low-cost, smart business in the connected world. Based on our own IoT building blocks we can create ready-to-use solutions for smart lighting, smart city, healthcare or site management projects.

**Rapid prototyping & production** - [Comarch IoT Lab](#) provides sophisticated infrastructure facility suitable for low-volume hardware production complemented by services ranging from industrial design and rapid prototyping up to assembling, quality assurance, and flying probe testing.

**Cyber Security solutions** - We have developed an in-depth understanding of cyber security threats and addressed them in our market-proven security solutions for [authentication & authorization](#), [identity & access management](#) as well as [cryptographic tokens](#).

**Field Service Management** - [Comarch FSM](#) offers support in various areas including service order placement, scheduling, technician assignment depending on skills and availability, route optimization, equipment allocation as well as service level agreements and reports management.

**Comarch** is a software house operating on the global market since 1998. With customers in 60 countries, we are a trusted partner for all kinds of IT projects and innovative solutions. Our Data Centers in Poland and Germany enable offering a variety of business models, including SaaS and Managed Services. Portfolio of our customers includes companies such as ING, Tesco, T-Mobile, Allianz, Danone, Coca-Cola, Carrefour, Heathrow, BP, Nokia, VW, Skoda, to name a few. Comarch is valued not only by its customers but also by the renowned IT analyst companies such as DiS, Gartner, IDC, Truffle 100 or Frost & Sullivan.
